PURPOSE

In an effort to protect the health and safety of our employees, the Santa Clarita Valley International Charter (SCVi) has prepared a COVID-19 prevention program (“Program”) intended to provide information related to the prevention of coronavirus, describe SCVi Charter policies, procedures and practices to keep employees safe, and to help prevent the spread of coronavirus in the workplace.

This Program is applicable during the current COVID-19 public health emergency. The protocols outlined in this document will be modified based on the ongoing and updated guidance from the Center for Disease Control (“CDC”), state and local public health agencies, and SCVi operations.

The Prevention Program is intended to comply with state and local law regarding employees’ safety including Labor Code §6400 which requires that every employer must furnish employment, and a place of employment that is safe and healthful for the employees therein.

The Director of SCVi has overall responsibility for managing the SCVi COVID-19 Prevention Program. In addition, SCVi expects all supervisors to implement and maintain the Program in their departments and assigned areas.

SCOPE

This policy applies to all SCVi employees. It contains general prevention best practices, as well as SCVi policies and procedures related to COVID-19 in the workplace.

WHAT IS COVID-19

COVID-19 is caused by the coronavirus SARS-CoV-2. COVID-19 is a new disease, caused by a novel (or new) coronavirus that has not previously been seen in humans.

COVID-19 affects people in different ways. Infected people have reported a wide range of symptoms - from mild symptoms to severe illness. Some infected individuals have no symptoms at all. Symptoms may appear 2 to 14 days after exposure to the virus. Symptoms of COVID-19 may include:

- Fever
- Chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches.
- Headache
- Loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea and vomiting
- Diarrhea

Laboratory testing is necessary to confirm an infection.

COVID-19 TRANSMISSION

The virus that causes COVID-19 is thought to spread mainly from person to person through respiratory droplets produced when an infected person vocalizes, exhales, coughs or sneezes. These droplets can enter the respiratory tract (mouth, nose, and lungs) of people who are nearby and cause infection. Particles containing the virus can travel more than 6 feet, especially indoors, so physical distancing must be combined with other controls, including wearing face coverings and hand hygiene, to be effective. Spread is more likely when people are in close contact with one another (i.e., within six feet) while not wearing face coverings.

INFECTION PREVENTION MEASURES – CONTROL OF COVID-19 HAZARDS

SCVi, to the extent possible, will implement the following guidelines and practices to mitigate employee exposure to the coronavirus in the workplace:

1. Provide and require employees to use face coverings when required by LACDPH and CDPH
2. Note: Face coverings are not considered respiratory or personal protective equipment (“PPE”), but combined with physical distancing, they help prevent infected persons without symptoms or who are pre-symptomatic from unknowingly spreading the coronavirus.
3. All staff will be encouraged to be vaccinated. All non vaccinated employees will be tested weekly.
4. SCVi will maximize, to the extent possible, the quantity of outside air into our buildings and workplaces with mechanical or natural ventilation
5. Distribute posters, notices, and/or signage to each work site to be displayed in common areas that provide physical distancing guidelines.
6. Encourage sick employees to stay home.
7. If an employee becomes symptomatic with COVID-19 while at work, they will be asked to leave the workplace and seek medical treatment, depending on the symptoms.
8. SCVi will adhere to state guidance and local public health recommendations regarding the prearrangement of office and workplace furniture to maintain physical distancing.
9. To the extent supplies are in stock and readily available for distribution, employees will have access to appropriate hygiene products in the workplace.
10. SCVi encourages frequent hand washing with soap for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility. Hand sanitizer doesn’t work if the hands are soiled so every effort must be made to wash hands before applying hand sanitizer.
11. SCVi will place signs and/or instructions in common areas (for example, reception area, break rooms, public common areas, et cetera) to communicate physical distancing requirements and to provide other COVID-19 infection prevention information to the general public entering the workplace, the work site and buildings.

INVESTIGATION, IDENTIFICATION AND CORRECTION OF COVID-19 HAZARDS

SCVi takes seriously its obligation to locate, identify and correct potential COVID- 19 hazards in the workplace. SCVi will have a COVID Task Force Team that investigates and Identifies COVID hazards and works to remediate the hazard. The following will be implemented:

COVID 19 Team:

- ❑ Site Directors- Chad Powell, Martha Spansel-Pellico

- ❑ Office Manager - Donna Wood
- ❑ Leadership - Alan Kingsley
- ❑ Custodial - Nabor Hernandez
- ❑ School Health Care Assistant - Carolina Jimenez

The Covid 19 team will:

1. Evaluate employee workspaces for potential hazards. Employees are encouraged to identify and bring to management’s attention potential COVID-19 hazards in their workspace.
2. Conduct inspections of the facility to identify and correct potential hazards that exist in common areas, high traffic areas, and other areas frequented by employees and the public.
3. Evaluate site policies, procedures, work practices, and staffing issues to determine whether any of our processes or policies can be changed or amended to reduce or eliminate COVID-19 hazards.
4. Conduct workplace specific evaluations of hazards following any positive COVID-19 case in the workplace, and identify and eliminate COVID-19 hazards.
5. In order to protect employees in the workplace it will also investigate each positive COVID-19 case to help identify those employees who were in close contact with the infected employee, and require all those potentially exposed to quarantine as required by law.
6. Regularly evaluate the workplace for compliance with this program.
7. Unsafe and unhealthy hazards, work conditions, practices, policies or procedures will be documented and corrected in a timely manner based on the severity of the hazards. Correction priority and correction times will be based on the immediacy of the unsafe or unhealthy hazard.

EMPLOYEE RESPONSIBILITIES

During the COVID-19 public health emergency, SCVi employees have a collective responsibility to ensure the protection of all people in the workplace, to comply with SCVi policies and the latest local public health guidelines to mitigate coronavirus risk to themselves and anyone visiting the work site.

Employees have the following affirmative responsibilities:

Employees must self-screen for COVID-19 symptoms prior to entering the facility when required by LACDPH and CDPH.. Employees should stay home and seek medical treatment if they experienced any of the following symptoms in the past 48 hours:

- fever of 100.4 degrees fahrenheit or higher
- feeling feverish (chills/sweating)
- new cough (different from baseline)

- shortness of breath
- muscle or body aches
- diarrhea or vomiting
- new loss of taste or smell

Employees must immediately report any symptoms of COVID-19 they experience whether the symptoms developed while at work or elsewhere. Employees must also promptly disclose positive COVID-19 tests.

An employee must stay home if they are sick, follow public health agency guidelines, and contact their supervisor or manager for further instructions.

Employees who are symptomatic must isolate and test. Employees can return to work when they have been 24 hours fever free with no fever-reducing medications and other symptoms have improved and have a negative test for COVID or a healthcare provider has provided documentation that the symptoms are typical of underlying health condition or alternative diagnosis or 10 days have passed since symptom onset.

Employees must cooperate with SCVi in any investigation related to the onset of illness, date of symptoms, others with whom the employee had close contact, and coronavirus testing among other topics. The investigation will help SCVi to identify employees who may have been exposed and quarantine them so there is no further workplace exposure.

Employees who test positive for the COVID-19 virus must not return to work until the following occurs:

When Symptomatic

- At least 10 days have passed since COVID-19 symptoms first appeared
- At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever and reducing medications;
- COVID-19 symptoms have improved.

When Asymptomatic

Employees who test positive, but never developed COVID-19 symptoms shall not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.

Employees who return to work following an illness must promptly report any recurrence of symptoms to their immediate supervisor.

Employees shall practice physical distancing, wear face coverings and remain at least 6 feet apart when practicable.

Employees must avoid shared workspaces (desks, offices, and cubicles) and work items (phones, computers, other work tools, and equipment) whenever possible. If employees must share workspaces, clean and disinfect shared workspaces and work items before and after use. Employees shall wash hands with soap and water for at least 20 seconds and/or use hand sanitizer after interacting with people and after contacting shared surfaces or objects.

Employees shall cover coughs and sneezes, and avoid touching eyes, nose, and mouth with unwashed hands.

Employees must avoid sharing personal items with co-workers (for example, dishes, cups, utensils, towels).

Employees shall notify their manager or supervisor if any washing facilities do not have an

adequate supply of suitable cleaning agents, water, single-use towels, or blowers

PERSONAL PROTECTIVE EQUIPMENT

While engineering and administrative controls are considered more effective in minimizing exposure to COVID-19, personal protective equipment (PPE) may also be needed to prevent certain exposures. While correctly using PPE can help prevent some exposures, it should not take the place of other prevention strategies. Examples of PPE include gloves, goggles, face shields, face masks, and respiratory protection, when appropriate. During the outbreak of infectious diseases, such as COVID-19, recommendations for PPE specific to occupations or job tasks may change depending on the updated risk assessments for workers, and information on PPE effectiveness in preventing the spread of COVID-19.

Face Covering

- Employees, learners, and anyone visiting sites will make sure to wear a fresh face covering when required by LACDPH and CDPH
- Cloth face covering should be washed and cleaned after a day's use.
- Families are reminded to wash and clean their child's face covering.
- Face covering must cover both mouth and nose.
- SCVi will supply all necessary and required PPE, including face coverings.
- SCVi will clean any soiled PPE and replace any damaged PPE.
- If employees wish to use additional PPE, they should initiate the request with their direct supervisor.
- Signs will be posted at all entrances and throughout the site to remind everyone on site to wear a face covering.
- A medical grade mask will be provided to any employee caring for sick children or who has close contact with any child with a medical condition that precludes the child's use of a cloth face covering.

PHYSICAL DISTANCING

SCVi will maintain signs and notices to ensure physical distancing is in place when required by LACDPH and CDPH

- SCVi has determined the maximum number of employees based on maintaining 3 feet of social distancing for learners and six feet of social distancing for staff whenever possible.
- All work areas are configured for six feet of social distancing.
- SCVi has looked at room usage and determined the maximum capacity based on 6 feet of social distancing..
- Social distancing markers will be placed at the entrances to sites.
- SCVi has determined a flow of traffic pathways, that will be indicated by arrows and social distancing markers highlighting the flow of traffic.
- Staff will be deployed in designated areas during high traffic times to help learners maintain six feet of social distancing.
- Stairways will be designated with up and down paths of travel.
- Elevators will have a maximum capacity of one occupant, unless there is a need to assist another person.

Hygiene Practices

SCVi places a high priority on good hygiene practices and will encourage all employees and learners to practice the following:

- Ethyl alcohol-based (contains at least 60% ethanol) hand sanitizer will be available at all entrances.
- At arrival, everyone will be encouraged to use hand sanitizer prior to entering the site.
- Hand washing will be available on campus. (Bathrooms/Break Rooms/Classrooms if equipped/ Handwashing stations)
- Employees and learners will be given frequent opportunities to wash their hands.
- Employees will model good hand washing techniques to learners including:
 - Using soap
 - Rubbing thoroughly
 - Washing for 20 seconds
 - drying hands, for a safe and complete practice

CLEANING AND DISINFECTION POLICY AND PRACTICE

SCVi recognizes that high traffic and high touch common areas in the workplace need frequent cleaning and disinfecting to limit the spread of the COVID-19 virus. Break rooms, restrooms, classrooms, and other common areas used or visited by staff are cleaned at a frequency no less than once per day during periods of operation.

SCVi will assign personnel and establish routine schedules to clean and disinfect common areas and objects in the workplace. This includes, but is not limited to, copy machines, containers, counters, tables, desks, chairs, benches, door handles, knobs, drinking fountains, refrigerators, restroom and bathroom surfaces, and trash cans.

The process of disinfecting includes providing disinfecting products that are EPA approved for use against the virus that causes COVID-19 and following the manufacturer's instructions for all cleaning and disinfection products (for example, safety requirements, PPE, concentration, contact time).

Disinfectant Supplies:

- Work areas will be provided with disinfectant wipes.
- Work areas, break rooms, entrances, and high traffic areas will be provided with Ethyl alcohol-based (contains at least 60% ethanol) hand sanitizer.
- High touch items like drinking fountains should be cleaned frequently
- Playground equipment may be used if it is disinfected between cohort use.
- Only approved EPA cleaning products for school will be used.
- Custodial and other staff responsible for cleaning and disinfecting school surfaces and objects are trained on manufacturer's safety data sheets, Cal OSHA requirements for safe use, and as required by the Healthy Schools Act, as applicable.
- Custodial staff and other staff responsible for cleaning and disinfecting are equipped with appropriate personal protective equipment, including gloves, eye protection, respiratory protection and other appropriate protective equipment as required by the product.
- The EPA dwell time for our current disinfectant used by custodial staff is between 2-10 minutes.

- All cleaning products are kept out of children’s reach and stored in a space with restricted access.
- Ventilation is maximized during cleaning and disinfecting to the extent feasible. If using air conditioning, use the setting that brings in fresh air. Replace and check air filters and filtration systems regularly, to ensure optimal air quality.

WORK SITE SAFETY MEASURES

Arrival and Dismissal

SCVi will incorporate social distancing protocols to keep staff and learners safe at arrival and dismissal. These protocols include:

- Prior to entering the campus, parents or guardians will use app to complete a wellness check for their child;when required by LACDPH and CDPH
- Site assigned personnel will monitor completion and answers of the wellness survey;
- Signs will be posted to remind staff and learners to wear a mask, social distance, and what are symptoms of COVID-19;
- Social distancing markers will be in place to keep staff and learners 6 feet apart;when required by LACDPH and CDPH
- Ethyl alcohol-based hand sanitizer (contains at least 60% ethanol) will be in place at all entrances to the site.

Meetings

- It is recommended that meetings with parents take place via teleconferencing (ie. Zoom, Google Meets).
- Digital Files are to be used as much as possible to reduce face to face contact.

Workrooms, Production Centers, and Shared Copiers

- Workroom maximum capacity and marked at the entrance.
- After using copiers wipe down the area touched with provided disinfectant wipes.
- Commonly shared items, like pens, will be removed at this time.
- When using any other equipment or work table, wipe down before and after use.

Tools/Supplies/Equipment

- Employees and learners should avoid sharing items.
- To the extent possible, each employee will be provided with their own tools, supplies, or equipment needed to complete their job.
- If any tools, supplies, or equipment must be shared, it will be disinfected before and after use.

Important Hygiene Practices

- Wash hands frequently. Wash stations are available throughout the campus.
- Utilize Ethyl alcohol-based hand sanitizer that contains at least 60% ethanol. Hand sanitizer is available in common areas, workroom, breakroom, and entrances/exits.

Visitors

- It would be best practice to avoid having onsite visitors.
- If there is a need for business to be conducted in person, it is best practice to conduct business outside the main office.
- All visitors must:
 - Go through a verbal wellness screening when required by LACDPH or CDPH

- Office staff will ask screening questions prior to letting visitors into the site regardless of vaccine status
 - Screening questions:
 - Have you had any of the following symptoms: fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, fever of 100.4 or higher?
 - Have you been in contact with anyone that has tested positive for COVID in the past 10 days?
 - Have you been diagnosed with COVID in the past 10 days?
- If the visitor answers no to all of the questions, they will be allowed in and check-in using the lobby guard system.
- Limit movement on campus or designate meetings to a single building/room
- Visitors will be provided instructions regarding maintaining physical distancing and the required use face coverings when around others
- Visitors will sign out when they leave

Cafeteria

- “Grab and Go” meals will be provided on site

Non-school Facility Use

- Will be suspended until further notice

EXPOSURE MANAGEMENT PLAN

When there is a suspected or confirmed case of COVID-19, the site will:

- During operational hours:
 - Send an employee home or utilize the isolation room.
 - Learners will wait in the isolation room until they can be picked up.
 - Any employee caring for sick children, or who has close contact with any child with a medical condition that precludes the child’s use of a cloth mask, will be provided a medical grade mask.
 - Relocate staff and learners in the infected area until it can be disinfected.
- After Hours:
 - The site will instruct the employee/learner to quarantine/isolate at home.
- Identify close contacts to the case through investigation. The Director and/or COVID 19 Team will utilize the iLEAD COVID Response/fillable form see appendix A.
- Immediately notify exposed employees and families of learners. (Links with information on isolation and quarantine will be in the notification letter.)
- Assure access to testing for all exposed individuals within the school as the basis for further control measures. Links to testing facilities will be in the employee or parent notification letter.
- Report all COVID-19 exposures at the school to the Department of Public Health.
 - SPOT [SPOT Portal](#)

RESPONDING TO CONFIRMED OR SUSPECTED COVID-19 CASES

When required, SCVi will consult with state and local public health agencies for mitigation practices and responsible protocols. SCVi will follow the California Health Department strategies listed below for returning employees to work.

The following are considered minimum criteria for return to work and some variation may occur depending on individual cases, our local public health department, and unique circumstances.

Symptomatic Positive:

Employees with symptoms who are laboratory confirmed to have COVID-19.

1. At least 24 hours have passed since resolution of fever without use of fever reducing medications; and
2. At least 10 days have passed since symptom onset; and
3. Other symptoms have improved.

Asymptomatic Positive:

Employees who have never had symptoms and are laboratory confirmed to have COVID-19. A minimum of 10 days have passed since the date of their first positive COVID-19 tests being administered. If symptoms develop then the criteria for Symptomatic Positive cases will apply.

Symptomatic Negative:

Employees who have symptoms must stay home until fever free without fever reducing medication for 24 hrs and improved symptoms.

Close Contacts defined as when both parties were wearing a mask but within 6 ft of each other for over 15 minutes cumulative.

Close Contacts- Asymptomatic Negative:

Employees who never had symptoms but were tested due to a close contact with a laboratory confirmed case patient and were negative.

- If vaccinated no quarantine
- If tested positive for COVID 19 in the last 3 months - no quarantine
- If Unvaccinated Employees should quarantine at home for 10 days after the last known contact with the case-patient. Symptoms can develop even after testing negative within 10 days of exposure. The local health department and Cal/OSHA may consider allowing an earlier return to work only if an employee in a critical infrastructure industry in which the essential operations of the workplace would be compromised by quarantine of the employee and no alternate staff can perform the role. It must be shown that the removal of the employee would create an undue risk to a community's health and safety.

Close Contacts- Symptomatic Untested:

Employees who have symptoms of COVID-19, and were not tested. Testing is encouraged. If an employee cannot be tested or refuses to be tested, use the same criteria for return to work as Symptomatic Positive cases.

Close Contacts- Asymptomatic Unvaccinated:

When both parties were wearing a mask but within 6 ft of each other for over 15 minutes cumulative:

- Close contact must self-quarantine
- Monitor symptoms for 10 days after the last exposure to the infected person. If remains asymptomatic quarantine can end after Day 10 without testing, although they should monitor through Day 14.
- Quarantine may end after Day 7 if contact remains asymptomatic AND if a diagnostic specimen is collected after Day 5 from the date of last exposure and the result is negative, continue to monitor through Day 14.

If an employee tests positive for COVID-19, SCVi will immediately inform co-workers of their possible exposure to COVID-19 in the workplace but maintain confidentiality as required by the Americans with Disabilities Act (ADA) and the Fair Employment and Housing Act (FEHA). SCVi will also investigate any confirmed COVID-19 illness to determine and mitigate any work-related factors that may have contributed to the risk of infection.

SCVi will establish, implement, and maintain policies and procedures for COVID-19 testing of staff who had a COVID-19 exposure, who have COVID-19 symptoms, or as recommended by the local health department. SCVi will provide on-site testing of unvaccinated once a week as required by law.

The school testing section will be updated as needed based on further guidance from CDPA, consultation with labor, and/or legislative action.

Cleaning and Disinfecting Following a Confirmed COVID-19 Case.

1. Temporarily close the general area where the infected employee or guest worked/visited until cleaning has been completed.
2. If possible, open outside doors and windows and use ventilating fans to increase air circulation in the area. Wait 24 hours or as long as practical before cleaning and disinfecting the area.
3. Conduct deep cleaning of the entire general area where the infected employees worked and may have been, including break rooms, restrooms and travel areas with a cleaning agent approved for use by the EPA against the coronavirus.
4. Custodial personnel cleaning the area must be equipped with proper personal protective equipment for COVID-19 disinfection (disposable gown, gloves, eye protection, or mask, if required).

SYSTEM FOR COMMUNICATION

Communication between employees and SCVi on matters relating to COVID-19 mitigation and response is important to ensure employees' safety while in the workplace. Therefore, SCVi has a communication system that is intended to accomplish clear and concise exchange of information by providing a single point of contact for managers and supervisors. Employees are encouraged to freely communicate with their supervisors and managers with regard to coronavirus symptoms, possible exposures, workplace concerns, and suggestions for correction of potential hazards without fear of reprisal.

1. All SCVi employees are encouraged to report to their immediate manager or supervisor

concerns regarding COVID-19 mitigation practices or possible COVID-19 exposure in the workplace.

2. Directors and supervisors who, after assessing the concern, determine that additional guidance or assistance is required shall contact Natasha Baugh, Director of Employee Services, who will assess the report and notify essential personnel for an appropriate response.
3. If an employee has a disability, medical, or another condition that puts them at increased risk of severe COVID-19 illness and accommodation is needed, they are encouraged to report it to Natasha Baugh, Director of Employee Services. SCVi will evaluate the request and determine, with input from the employee and health care provider, whether the employee can be accommodated.
4. SCVi will provide COVID-19 testing to potentially exposed employees.

*See Communications Appendix for communications procedures and letter templates.

MULTIPLE COVID-19 INFECTIONS AND COVID-19 OUTBREAKS

SCVi will adhere to the following policies and practices should the workplace experience a COVID-19 outbreak or major outbreak.

A COVID-19 outbreak is defined as 3 or more cases of COVID-19 in a 14 day period.

A major COVID-19 outbreak is defined as 20 or more cases of COVID-19 in a 30 day period.

1. SCVi will provide the legally mandated COVID-19 testing to all exposed employees in the workplace except those who were not present during the period of an outbreak. The testing will be provided at no cost to the employees and will occur during working hours. An NSD employee is considered an essential worker. Essential Workers are offered free testing at LA County locations. LA County Testing Sites can be found: <https://covid19.lacounty.gov/testing/>
2. All employees will be tested as frequently as required for a COVID-19 outbreak or a major COVID-19 outbreak. Additional testing will be provided when deemed necessary by Cal/OSHA.
3. We will quarantine and exclude all COVID-19 cases and those exposed to the COVID-19 cases as set forth above in Responding to Positive or Suspected COVID-19 Cases in the Workplace.
4. SCVi will immediately investigate and determine possible COVID-19 hazards that may have contributed to the outbreak in accordance with **Investigation**, Identification, and Correction of COVID-19 Hazards and Responding to Positive or Suspected COVID-19 Cases in the Workplace.
5. SCVi will perform a review of its COVID-19 policies, procedures, and controls and implement changes where needed. The investigation and review will be documented and include review of:
 - a. Leave policies and practices to insure employees are encouraged to remain home when sick;
 - b. COVID-19 testing process;
 - c. Insufficient outdoor air;
 - d. Lack of physical distancing, face coverings or use of other PPE;
 - e. Evaluation of mechanical ventilation, and, if possible, filter recirculated air with Minimum Efficiency Reporting Value (MERV) 13 or higher efficiency filters if compatible with the system. We will evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other cleaning systems would reduce the risk of

- transmission;
 - f. Determine the need for additional respiratory protection;
 - g. Determine whether to halt some or all operations until the COVID-19 hazard has been corrected;
 - h. Implement any other control measures as required by Cal/OSHA.
6. Notify the local health department as required by law.

REPORTING, RECORDKEEPING, AND ACCESS

SCVi is committed to following all local and state law requiring reporting, recordkeeping, and access to records. It is our policy to:

1. Record and track all COVID-19 cases, including the date of a positive test, as required by law. The record will be made available to employees, authorized employee representatives, or as otherwise required by law. All identifying information will be removed prior to providing access.
2. Report information about COVID-19 cases to the local health department when required by law and to provide the local health department all requested information.
3. Immediately report to Cal/OSHA any COVID-19 related serious illness or death, as defined by law, occurring in the workplace.
4. Keep and maintain records of SCVi's efforts to implement the written COVID-19 Prevention Program.
5. Make the COVID-19 Prevention Program available to employees, authorized employee representatives, and to Cal/OSHA immediately upon request.

EMPLOYEE TRAINING

SCVi will provide information and training in the general description of COVID-19, symptoms, when to seek medical attention, how to prevent the spread, and the employer's procedures for preventing its spread at the workplace. The training may consist of reviewing written documentation, in-person presentation, online video training and/or acknowledgment of receipt of SCVi COVID-19 prevention program.

Employees will be notified of the training and all employees are required to participate.

All Employees will receive a copy of this protocol via paycom app and it will be posted on school websites.

A staff member or learner has 2 symptoms of COVID-19 or loss of taste/smell

Site Director/ Actions	<ul style="list-style-type: none"> ❑ The employee/learner who works at/attends your site and household members must stay home until the individual with symptoms is symptom-free for 24 hours . ❑ Keep informed ASAP on any additional individuals showing symptoms.
